

January 2010

Dear Dr. Wolk-Weiss,

I am writing to express our deepest gratitude for your help, support and guidance over the last seven months.

When Jake and Kailyn arrived for their first NAET treatment I had no idea what to expect. Because they had both been suffering with respiratory issues, food and environmental allergies and repeated episodes with asthma since they were three months old, I was hopeful and optimistic that this treatment would make a small difference in their lives. But, I never imagined the major difference it would make in their overall health and in the lives of our active five year olds!

Both Jake and Kailyn immediately “took” to everyone in the office. Abby and Sue are amazing and in this warm, caring and inviting environment the kids soon began to look at their weekly visits to The Get Well Center as a “fun outing”. Through the NAET treatments it was incredible to discover all of the foods (and other items) the kids were allergic to and that were contributing to their asthmatic issues. These issues were also compromising their immune systems. Thank you, Dr. Wolk-Weiss for spending hours answering my many questions with such unbelievable patience and care. Adding the immune booster vitamins, Flax seed oil and other additional vitamins to their diet has also made a major difference in managing their daily health.

As you know, we have been able to cut down the allergy and asthma medications significantly, most importantly the oral steroids. We know it is only a matter of time before we will be able to eliminate asthma medications all together. Overall, I have watched as Kailyn and Jake’s quality of life has improved. The nebulizer treatments that were weekly (and sometimes daily) treatments have been reduced, which is a wonderful thing to see.

I want to spread the word to all parents who watch their children suffer with allergies, asthma, eczema and/or other chronic medical conditions to *please* consider NAET and treatment with The Get Well Center. While specialists and doctors told us “*There is really nothing you can do but treat the symptoms*”, you gave us an alternative that eliminated their allergies, restored their immune symptoms and overall improved Jake and Kailyn’s health.

There is really no way we can put into words how appreciative and thankful we are and so we will continue to “spread the word” and hope we can encourage other parents to join us in treatment at The Get Well Center.

Warmest Regards,

Sherry & John Riggi
